

## List of Top Social networking websites rated for 2012 by Google

How to find top social networking websites or **top social networks online for 2012**. How to rate top social networking websites, whether on number of members, number of page views, number of additional features like social chat rooms, social network news and updates, social communities online and others.

Social networking website is a online place where can members interact with each other socially and check each other's social updates. The only question is that they should be based on social networking website features or number of active social users. Definately top social networking website would be the website with highest number of active social members or users, there is no criteria to rate a Social networking website on top without consideration of numbers of users. **(Note:- Only active users are counted not in-active users)**

Google has provided a updated **list of top social networking website** based on number of users
